

2nd Community Conference

26th March 2010

Welcome

Cllr Andy Smith

Chair Suffolk Coast Futures

Alde and Ore Futures

Bill Parker

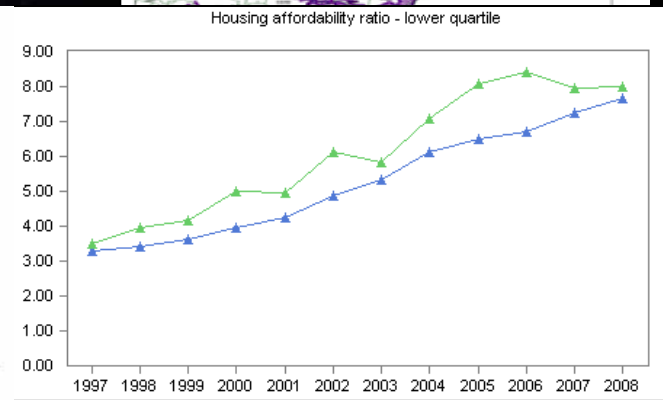

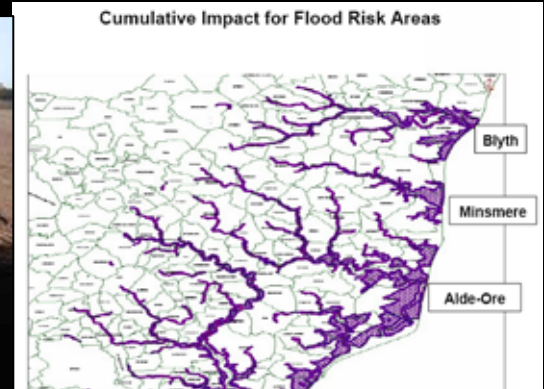

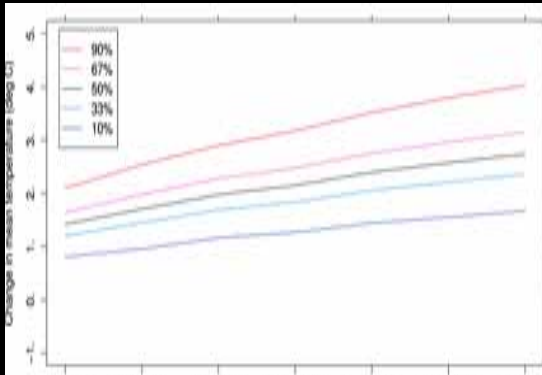

Project Officer

1st Community Conference 4th September 2009

Multiple Issues facing the Area

State of Public sector finance

Key lessons ICZM

- ❑ De 'brede blik':... be open minded and to keep an eye on other interests than those related to water
- ❑ 'Involve all kinds of parties and persons in looking to solve issues.
The creativity generated will surprise you.
- ❑ Try to find solutions for a multitude of issues at the same time. More complexity means:
 - ❑ More room for solutions
 - ❑ More possibilities for financing solutions
- ❑ Beware not to try solve issues in an area based approach that don't originate within the area itself
- ❑ 'Look for trouble': be aware of economic, social, spatial and/or other issues in a region that can be related

Alone, unique, experimental?

- ❑ Integrated area based approaches were started in the early nineties in the Netherlands
- ❑ Nowadays using area based approaches is the standard,
- ❑ At an integrated level (agricultural, ecological, urban, and water related issues combined for example)
- ❑ At a sectoral level (traffic related issues for example)

Why: because they have proven to be successful!

‘to secure the continuing prosperity and qualities of coastal areas and communities, whilst responding to climate change and the natural processes that occur along the coast’

Suffolk Coast Futures

Using an integrated coastal zone management (ICZM) approach to plan for and manage the coastal zone

Three key challenges:

- **Coastal Governance** or 'who decides what' and the alignment of policies
- **Enabling coastal communities** to take greater ownership of their future.
- Developing ways to **create multi funding programmes** to deliver action for sustainable coastal communities.

Shoreline Management Plan

- Defra initiative for England
- Complete by late 2010
- Strategy for the coastline upto 100 years
- Short / Medium / Long term
- 3 basic options:
 - Hold the Line
 - No Active Intervention
 - Managed Realignment
- Currently going through the approval process
- No funding guarantees

Aldeburgh Coast and Estuary Strategy (ACES)

Alde and Ore Futures

- Keeping coastal communities sustainable in the long term
- Based on an area
- Upto 2031
- New ways of working in partnership
- Tackle long term issues
- Find new ways to multi-fund action
- Improve the way decisions are made

SMP

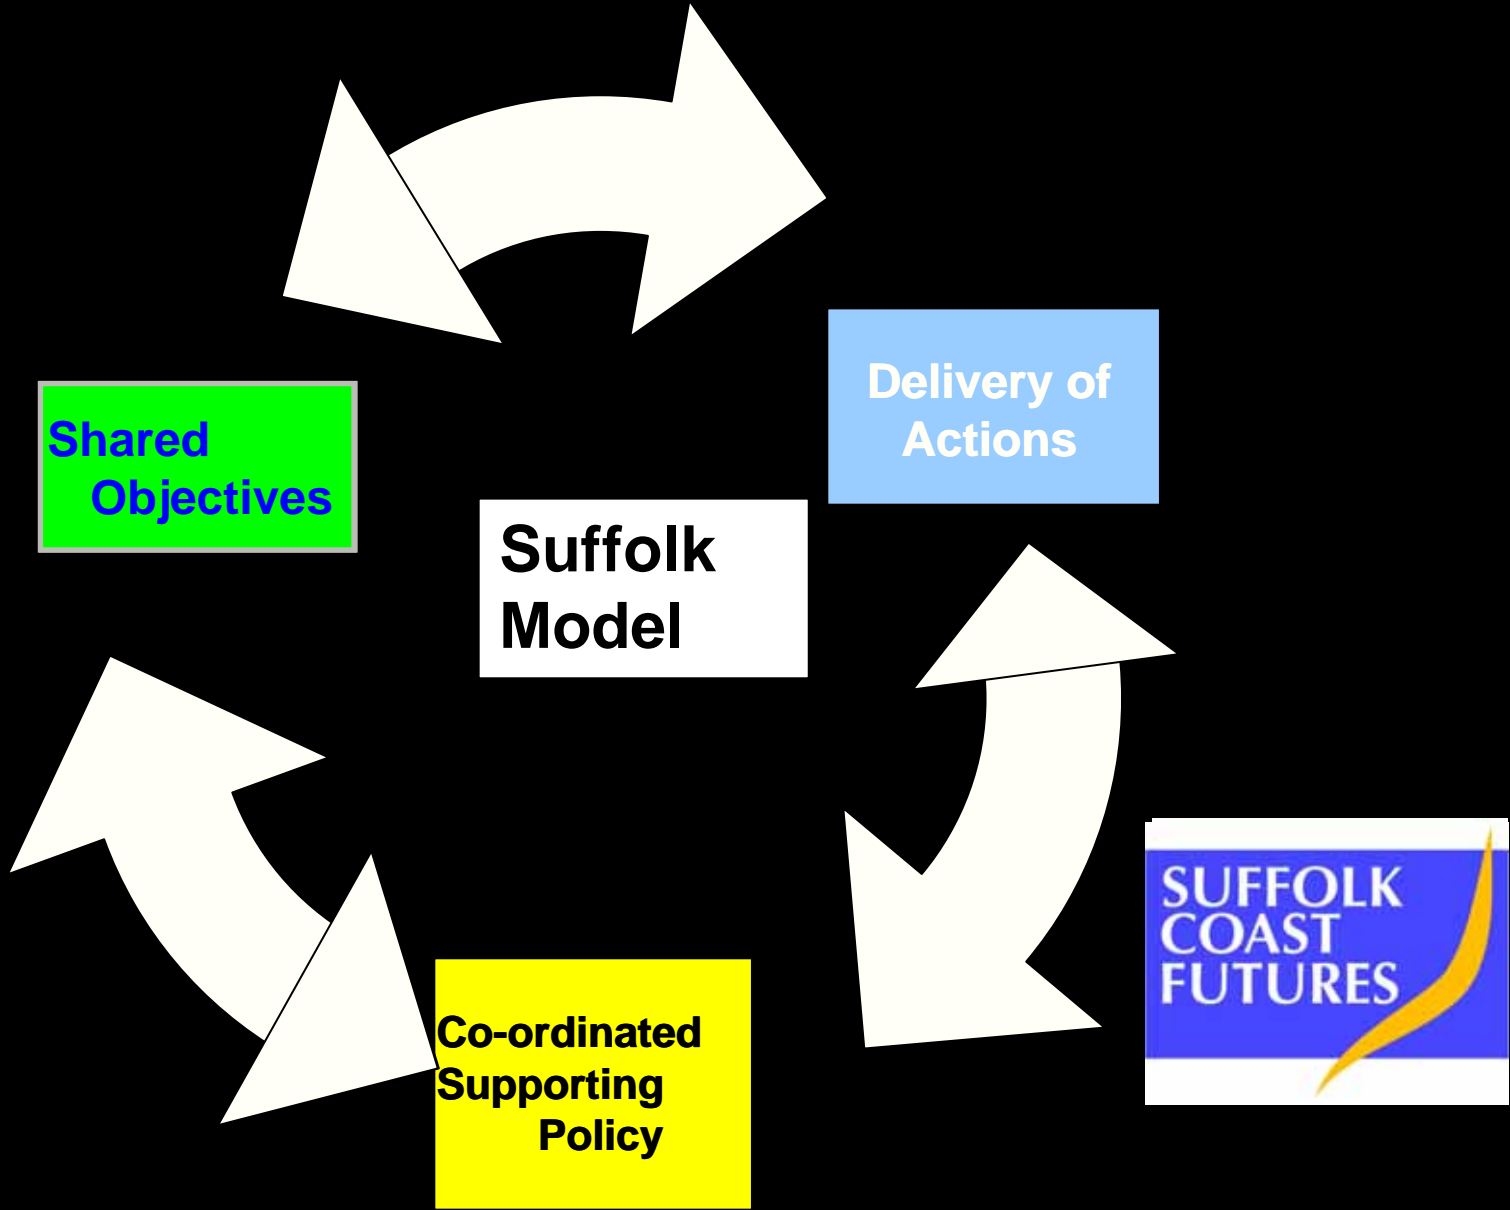

ACES

Futures

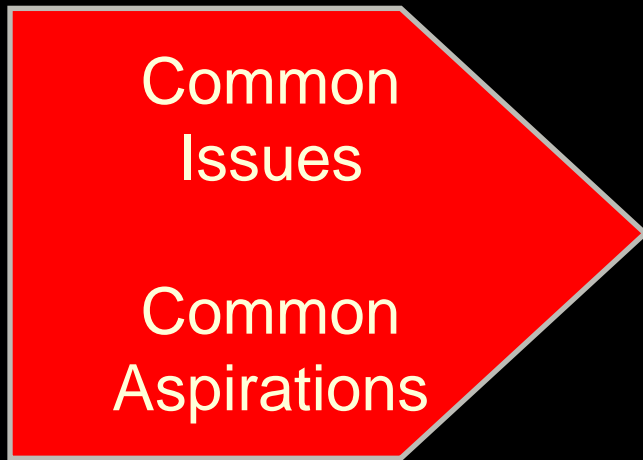

Focus on Alde and Ore Futures

Shared Objectives

Made up of:

- **Issues** – frustration with existing situation or process
- **Aspirations** – ambitions for the area

Shared Objectives

Individuals share
common
issues and
aspirations

Shared Objectives

Wider
Context

The real world we live in

No-one is isolated from legislation, or organisational policies that we have to work with.

Shared Objectives

Shared Objectives for the Alde and Ore

- Shared objectives
 - 1st Community Conference
 - Special nature of the area
 - Issues
 - Work of Topic Area
 - 2nd Community Conference

Common
Issues

Topic Areas

- Focus on key issues
- Identify solutions to the issues
- 5 Topic Areas
 - Communities
 - Business
 - Landowners
 - Environment, Recreation and Access
 - Art and Culture
- Chaired by member of the community
- Membership from community
- Supported by Officers
